WHY CHOOSE COMPOSITE OVER VINYL

Composite wood is a type of material that's made from wood fibers and plastic, while vinyl is a type of plastic that is made from non-renewable petroleum. Vinyl is not biodegradable and can release harmful chemicals like vinyl chloride, dioxins, and mercury.

Here are some advantages of composite over vinyl:

Appearance: Composite wood can mimic the look and feel of natural wood, while vinyl has a more artificial and uniform appearance. Composite wood also comes in a variety of colors and styles, while vinyl has a more limited range of options.

Durability: Composite wood is resistant to rot, mold, insects, and fading, while vinyl can crack, warp, fade, and become brittle over time, on account of heat, cold and wind. Composite wood also has a higher fire rating than vinyl, which means it is less likely to catch fire or melt.

Environmental impact: Our Composite wood is made from recycled materials, which reduces waste and conserves natural resources. Vinyl, on the other hand, is made from non-renewable petroleum, which contributes to greenhouse gas emissions and pollution.

WHY CHOOSE COMPOSITE OVER WOOD

Durability: Composite wood fencing can resist rot, mold, insects, and weather damage better than wood. It does not need frequent painting or staining, and can last for 15-20 years or more.

Sustainability: Composite wood fencing uses recycled materials, which reduces waste and environmental impact. It also does not contribute to deforestation, unlike wood fencing that requires cutting down trees.

Aesthetics: Composite wood fencing comes in various colors, styles, and designs that can match any preference or landscape. It can also mimic the look and feel of natural wood, without the drawbacks.

Therefore, composite wood fencing is a better choice than wood fencing for homeowners who want a durable, no maintenance, Eco-friendly, and attractive fence.

ADVANTAGES

- Simple Interlocking Install
- Low Maintenance
- Waterproof
- Eco Friendly
- Weatherproof
- Flame Retardant
- Noise Reduction
- Wind resistant
- 20 Years Warranty
- Timeless Appearance

EASY INSTALLATION

FENCE BOARD COLORS

charcoal

antique gray

brown

teak

beige

CUSTOMIZABLE GATES

By choosing the **Eco** Fence gate frame, you can customize the width of the door to fit any opening up to 3.5 feet. You can also personalize the filling by changing boards with the colors of your choice.

We offer custom orders in other sizes.
